

### Home Termination Unit

- Home optical Transceiver Unit NHP- 3155
- Home Termination Housing NHF- 3101

#### Applications

##### Incumbent cable operators

- Who gradually want to deploy fibre network architecture in alternative to conventional HFC-system and need to ensure today legacy CATV and DOCSIS-based services while preparing their network infrastructure for the future.

or

- Want to extend the reach of HFC network to remote single residences, deploying fiber technology.

#### Key features

##### TV Transceiver

- Two- way communication 5-65/47-862MHz
- Complies with CENELEC & DOCSIS Standards
- High RF output for in-house distribution
- Ruggedised compact cast Aluminium housing
- Plug & Play functionality

##### Termination housing

- Accomodate CATV Transceiver & Media converter
- Weather resistant moulded housing
- Fiber protection & splicing area
- Dedicated rubber for cable entries
